

# Fit360OS - 50 Home Bodyweight HIIT Exercises

## Equipment-Free Exercise Library for Home Training

This library is organized by movement type and includes the main target area, relative impact level, a concise execution cue, and an easier modification. Use exercise choices and work-to-rest ratios that match the trainee's fitness level, movement quality, space, and joint tolerance.

| Category         | Exercises |
|------------------|-----------|
| Cardio & Agility | 10        |
| Lower Body       | 15        |
| Upper Body       | 10        |
| Core             | 10        |
| Full-Body HIIT   | 5         |
| Total            | 50        |

**Simple HIIT use:** choose 5-8 exercises, work for 20-40 seconds, rest for 20-40 seconds, and repeat 2-4 rounds according to fitness level. Technique should stay clean throughout.

# Cardio & Agility

| #  | Exercise             | Main Target                     | Impact       | Execution Cue                                                                | Easier Modification                               |
|----|----------------------|---------------------------------|--------------|------------------------------------------------------------------------------|---------------------------------------------------|
| 1  | Jumping Jacks        | Full body / cardiovascular      | Moderate     | Land softly with knees slightly bent; keep a steady rhythm.                  | Step one foot out at a time instead of jumping.   |
| 2  | High Knees           | Hip flexors / core / cardio     | High         | Run in place and drive knees upward while keeping torso tall.                | March quickly with controlled knee lifts.         |
| 3  | Butt Kicks           | Hamstrings / cardio             | Moderate     | Jog in place and bring heels toward glutes without leaning forward.          | Alternate heel curls without hopping.             |
| 4  | Skater Steps         | Glutes / lateral chain / cardio | Moderate     | Move side to side, loading the outside leg and keeping hips back.            | Step laterally without the hop.                   |
| 5  | Fast Feet            | Calves / cardio / coordination  | High         | Stay light on the balls of the feet and take quick short steps.              | Slow the cadence while maintaining movement.      |
| 6  | Seal Jacks           | Chest / shoulders / cardio      | Moderate     | Jump feet apart while opening arms; close arms and feet together.            | Step side to side while opening and closing arms. |
| 7  | Power March          | Hip flexors / core / cardio     | Low          | Drive opposite arm and knee with a fast marching rhythm.                     | Reduce knee height and pace.                      |
| 8  | Lateral Line Hops    | Calves / ankles / cardio        | High         | Hop side to side over an imaginary line with soft, quick landings.           | Step side to side over the line.                  |
| 9  | Front-Back Line Hops | Calves / cardio                 | High         | Hop forward and backward over an imaginary line while staying light.         | Step forward and backward quickly.                |
| 10 | Shadow Boxing        | Shoulders / core / cardio       | Low-Moderate | Punch quickly while rotating lightly through the torso and keeping guard up. | Use slower punches and smaller torso rotation.    |

## Lower Body

| #  | Exercise                  | Main Target                | Impact   | Execution Cue                                                                | Easier Modification                             |
|----|---------------------------|----------------------------|----------|------------------------------------------------------------------------------|-------------------------------------------------|
| 11 | Bodyweight Squat          | Quads / glutes             | Low      | Sit hips down and back, keep whole foot planted, and track knees over toes.  | Use a chair as a depth target.                  |
| 12 | Squat Pulse               | Quads / glutes             | Low      | Hold the lower half of the squat and pulse through a small controlled range. | Use a shallower squat.                          |
| 13 | Jump Squat                | Quads / glutes / calves    | High     | Explode upward, then land softly and immediately control the next squat.     | Perform fast bodyweight squats without jumping. |
| 14 | Reverse Lunge             | Quads / glutes             | Low      | Step backward, lower both knees, and drive through the front foot to return. | Reduce lunge depth.                             |
| 15 | Alternating Forward Lunge | Quads / glutes             | Moderate | Step forward under control and push back to the start without wobbling.      | Use reverse lunges instead.                     |
| 16 | Lateral Lunge             | Adductors / glutes / quads | Low      | Step wide, sit into one hip, and keep the opposite leg long.                 | Shorten the side step.                          |
| 17 | Curtsy Lunge              | Glutes / quads             | Moderate | Step one leg diagonally behind while keeping front knee aligned.             | Use a regular reverse lunge.                    |
| 18 | Split Squat               | Quads / glutes             | Low      | Stay in a staggered stance and lower vertically through both knees.          | Hold a wall for balance.                        |
| 19 | Alternating Jump Lunge    | Quads / glutes / cardio    | High     | Switch legs in the air and land softly into the next lunge.                  | Alternate reverse lunges without jumping.       |
| 20 | Glute Bridge              | Glutes / hamstrings        | Low      | Drive through heels, squeeze glutes, and avoid over-arching the lower back.  | Use a smaller range of motion.                  |
| 21 | Single-Leg Glute Bridge   | Glutes / hamstrings        | Moderate | Keep pelvis level while extending the hips from one planted foot.            | Use the two-leg glute bridge.                   |
| 22 | Donkey Kick               | Glutes                     | Low      | Keep core braced and drive one heel upward without twisting the pelvis.      | Use a smaller hip-extension range.              |
| 23 | Fire Hydrant              | Glute medius / hips        | Low      | Lift the bent knee out to the side while keeping hips square.                | Reduce the lift height.                         |
| 24 | Calf Raise                | Calves                     | Low      | Rise onto the balls of the feet, pause briefly, and lower with control.      | Hold a wall for balance.                        |
| 25 | Wall Sit                  | Quads / glutes             | Low      | Keep back against the wall and hold a comfortable knee angle.                | Stand slightly higher to reduce intensity.      |

# Upper Body

| #  | Exercise                | Main Target                 | Impact   | Execution Cue                                                                        | Easier Modification                        |
|----|-------------------------|-----------------------------|----------|--------------------------------------------------------------------------------------|--------------------------------------------|
| 26 | Push-Up                 | Chest / triceps / shoulders | Moderate | Keep body in one line and lower chest between the hands under control.               | Perform from the knees.                    |
| 27 | Knee Push-Up            | Chest / triceps             | Low      | Maintain a straight line from knees to head and lower the chest smoothly.            | Use a shorter range.                       |
| 28 | Wide Push-Up            | Chest                       | Moderate | Place hands wider than shoulders and keep elbows controlled, not flared excessively. | Perform from knees.                        |
| 29 | Diamond Push-Up         | Triceps / chest             | High     | Keep hands close under the chest and elbows tracking back.                           | Use knees or widen hand position slightly. |
| 30 | Pike Push-Up            | Shoulders / triceps         | High     | Lift hips high and lower the head between the hands with control.                    | Reduce hip height.                         |
| 31 | Shoulder Tap            | Shoulders / core            | Moderate | From high plank, touch opposite shoulder while resisting hip rotation.               | Widen feet or perform from knees.          |
| 32 | Plank Up-Down           | Triceps / shoulders / core  | High     | Alternate between forearms and hands while keeping hips steady.                      | Perform from knees.                        |
| 33 | Inchworm Walkout        | Shoulders / chest / core    | Moderate | Hinge forward, walk hands to plank, then walk back without rushing.                  | Bend knees more during the hinge.          |
| 34 | Bear Plank Shoulder Tap | Shoulders / core / quads    | High     | Hover knees just off the floor and tap opposite shoulder without shifting hips.      | Keep knees on the floor.                   |
| 35 | Scapular Push-Up        | Serratus / shoulder girdle  | Low      | Keep elbows straight and move only the shoulder blades together and apart.           | Perform from knees.                        |

# Core

| #  | Exercise                    | Main Target             | Impact   | Execution Cue                                                            | Easier Modification                              |
|----|-----------------------------|-------------------------|----------|--------------------------------------------------------------------------|--------------------------------------------------|
| 36 | Forearm Plank               | Anterior core           | Low      | Squeeze glutes and keep ribs stacked over pelvis without sagging.        | Perform from knees.                              |
| 37 | Side Plank                  | Obliques / lateral core | Moderate | Keep hips lifted and body in a straight line.                            | Bend the lower knee for support.                 |
| 38 | Dead Bug                    | Deep core               | Low      | Keep lower back gently braced as opposite arm and leg extend.            | Move only the legs or shorten the lever.         |
| 39 | Bicycle Crunch              | Obliques / abs          | Moderate | Rotate rib cage toward opposite knee rather than pulling the neck.       | Keep feet closer to the floor.                   |
| 40 | Reverse Crunch              | Lower abs               | Low      | Curl pelvis toward ribs using abdominal control, not momentum.           | Use a smaller pelvic curl.                       |
| 41 | Straight-Leg Raise          | Abs / hip flexors       | Moderate | Keep lower back controlled as legs lower; stop before the back arches.   | Bend knees.                                      |
| 42 | Flutter Kicks               | Lower abs / hip flexors | Moderate | Keep legs long and make small alternating kicks while bracing the trunk. | Raise legs higher or bend knees.                 |
| 43 | Heel Taps                   | Obliques / abs          | Low      | Crunch slightly and reach side to side toward each heel.                 | Bring heels closer to the hips.                  |
| 44 | Plank Knee-to-Elbow         | Core / hip flexors      | High     | From high plank, drive knee toward same-side elbow without bouncing.     | Move slowly or perform from an elevated surface. |
| 45 | Cross-Body Mountain Climber | Obliques / cardio       | High     | Drive knee toward opposite elbow while keeping shoulders over hands.     | Slow to a controlled cross-body knee drive.      |

## Full-Body HIIT

| #  | Exercise         | Main Target               | Impact | Execution Cue                                                             | Easier Modification                                |
|----|------------------|---------------------------|--------|---------------------------------------------------------------------------|----------------------------------------------------|
| 46 | Mountain Climber | Core / shoulders / cardio | High   | Alternate knee drives quickly while maintaining a strong plank line.      | Slow the knee drives.                              |
| 47 | Plank Jack       | Core / shoulders / cardio | High   | Jump feet apart and together without letting hips bounce.                 | Step one foot out at a time.                       |
| 48 | Squat Thrust     | Full body / cardio        | High   | Squat down, place hands, jump to plank, jump back in, then stand tall.    | Step feet back and in instead of jumping.          |
| 49 | Burpee           | Full body / cardio        | High   | Move from standing to plank and back smoothly; land softly on the jump.   | Remove the push-up and/or jump; step back instead. |
| 50 | Half Burpee      | Full body / core / cardio | High   | From plank, jump feet toward hands and back to plank without standing up. | Step feet forward and back one at a time.          |

**Safety note:** High-impact drills are not appropriate for everyone. Substitute low-impact versions when needed, especially for beginners or people with pain, balance limitations, or joint concerns. Stop an exercise if it causes sharp pain, dizziness, or unusual symptoms.
